Upon entering the correct 6-digit code, a green tick shows to the right of the input field and the page is reloaded with the user successfully signed in.	**PASS**

Incorrect input focus after entering an incorrect code - BUG

Description:
When signing in to the site with an email address, you are sent a 6-digit verification code which you are then asked to enter. The code is submitted as soon as you type the 6th digit, and there is no submit button to manually click, therefore, if you enter an incorrect code, you should be able to enter a new code immediately, but you cannot, as the focus for user input is on the last digit rather than the first.

Steps to recreate:
Follow steps 1-6 from the above test case, **"Sign in with email, incorrect code"**

Expected result:
Upon entering an incorrect code, the individual digit input fields are cleared and the user is immediately able to enter a new code.

Actual result:
Upon entering an incorrect code, the individual digit input fields are closed, but the input focus is on the last digit's input box, requiring the user to manually click the first digit's box in order to start entering a new code.

5. Wait 10 minutes	10 minutes have passed.	10 minutes have passed.	**PASS**
6. Enter the code that was sent to the email address	The code input fields are highlighted in red and an error message appears below indicating the code has expired.	Upon entering the expired 6-digit code, a green tick shows to the right of the input field and the page is reloaded with the user successfully signed in.	**FAIL**

Code does not expire after 10 minutes - BUG
Description:
When signing in to the site with an email address, you are sent a 6-digit verification code which you are then asked to enter. The code is supposed to expire after 10 minutes, but in reality, you are still able to sign in with the code even when it should have already expired.
Steps to recreate:
Follow steps 1-6 from the above test case, **"Sign in with email, expired code"**
Expected result:
Upon entering an incorrect code, the individual digit input fields are cleared and the user is immediately able to enter a new code.
Actual result:
Upon entering an incorrect code, the individual digit input fields are closed, but the input focus is on the last digit's input box, requiring the user to manually click the first digit's box in order to start entering a new code.

2. Select the offer "The Hoxton Williamsburg"	The details of the offer will appear in a new page	A new page opened with details on the offer	**PASS**

Button reviews - BUG

Description:

When clicking the buttons in the offer page they all lead to the reviews section

Steps to recreate:
       Enter "Kayak" website
       Write a location name
       Choose a start date and an end date
       Select 1 room and 1 guest
       Click on search
       Select an offer (that has reviews)
       Click on a button in the overview section

Expected result:
    The button will redirect you to the appropriate section

Actual result:
    All of the buttons lead you to the reviews section

Notes:

Severity:
    Low

Priority:
    Low

Final date +1 - BUG

Description:
    It is possible to select a date beyond the limits of the calendar

Steps to recreate:
1. Enter "Kayak" website
2. Write a location name
3. In the "start date" choose the final possible date, making the "end date" become a day after the final possible date
4. In the "rooms and guests" box pick 1 room and 1 guest
5. Click on the "search" button

Expected result:
    A text box would appear saying: the date that was entered cannot be chosen, choose another date.

Actual result:
    The page turns to the results page with 0 results and immediately returns to a new "stays" page

Sorry, your search has expired or failed.

KAYAK wants to make sure that you are able to book your preferred flight, hotel or car.

Start a new search.

Over the max amount of rooms and guests - BUG

Description:
It is possible to select more rooms and guests than the site offers

Steps to recreate:
1. Enter "Kayak" website
2. Write a location name
3. Choose a start date and an end date
4. In the rooms and guests box write 1 room, 1 adult, and 30 children
5. Using the – button, remove 1 child
6. Click on apply
7. Click on search

Expected result:
A text box would appear with text that warns that "the limit for 'Rooms and Guests' has been exceeded" would appear and prevent you from reaching the search results

Actual result:
After clicking on "search" the site attempts to find offers with 1 rooms, 2 adults, and 0 children instead of searching for offers with 10 rooms, 10 adults, and 29 children.

Countries are not in the correct color on the map - BUG

Description:
After pressing the button in activation mode, the countries change but do not change accordingly on the map

Steps to recreate:

1. navigate to kayak website https://www.il.kayak.com/
2. Click on the tab 🛡 Travel restriction
3. click on the button, ⚪
4. in the Closed click on 3 countries
5. check the country (nauro, Turkmenistan, Western Sahara) in the map

Expected result:
in the Closed 3 countries (nauro, Turkmenistan, Western Sahara) will appear on red color

Actual result:
you see just Turkmenistan on the red color

Notes:

Severity:
Low

Priority:
Low

Q cars and flights	

⚠ **KAYAK Job Scams**

There has been a rise in scammers impersonating companies such as KAYAK, offering fake job opportunities to job seekers.
The scammers usually make unsolicited contact with people via Phone, WhatsApp, Instagram, LinkedIn, or email, fraudulently using KAYAK's brand name and logo. The scammers have also referenced KAYAK's executive team members in order to solicit trust in individuals. The scammers offer fake job opportunities and ask people to complete certain steps (such as setting up an online profile or entering personal information) in return for payments/commission. Sometimes the scammers will even pay people a small amount to gain their trust and then ask that person to pay money in order to earn higher commissions.

Important reminders	⌄

What should you do if you think you came across a scam or are a victim of a scam?	⌄
